Office demand in Albuquerque often comes from smaller tenants. However, several recent expansions from Netflix and TaskUs were big wins for local officials and economic development groups.

Construction has been limited in the last decade, particularly when compared to the years leading up to the Great Recession. The pipeline remains sparse and supply-side pressure on fundamentals is unlikely to occur in the near term.

The average office rent in Albuquerque is about half of the National Index and is a major draw for corporations seeking to expand or relocate to a low-cost location. Consistent rent growth has been hard to come by and rents have been relatively flat in the past decade. New Mexico's non-disclosure status can cloud the investment picture, but research by CoStar has uncovered that Albuquerque has been a fairly active market in the past several guarters. Most investors come

Employment in Albuquerque is heavily concentrated in government, education and health services. Government entities represent some of the largest office tenants in the metro, including the state and city government, as well as two of the Department of Energy's largest laboratories, Los Alamos and Sandia. The public sector's reliance on the oil industry, particularly in the form of tax revenue and royalties, exposes it to more oil volatility than most government-heavy metros.

In what is typically a quiet office market, Albuquerque's vacancy rate has remained stable since the onset of the pandemic. With supply pressure a non-issue, the market has a better chance of holding steady unless demand falls off dramatically. Local officials and economic development groups have put an emphasis on diversifying the economy, specifically with jobs from high value-add industries that have leased large blocks of space in the market.

Netflix announced plans to acquire Albuquerque Studios. The 257,000-SF property includes 100,000 SF of office space. The entertainment company projects it will invest \$1 billion for its productions in the state and create about 1,000 jobs annually over the next decade. Netflix's expansion into Albuquerque was facilitated through funding from New Mexico's Local Economic Development Act that included \$10 million and \$4.5 million from the city of Albuquerque.

In the largest lease of this cycle, excluding government and healthcare tenants, California-based TaskUs leased 100,000 SF at The Galleria in Downtown. The virtual customer service company plans to bring roughly 700 jobs to their new location over the next five years.

The presence of Kirtland Air Force base has resulted in ancillary businesses needing office space. Leidos, an aerospace company, signed one of the biggest office leases last year when it took nearly 29,000 SF at Century Plaza in Downtown. In the year prior, aerospace Giant Raytheon inked a lease for 72,000 SF at the Sandia Science and Technology Park in the Southeast Heights submarket.

REAL ESTATE ADVISORS

After decelerating through 2020 amid the onset of the pandemic, rent growth has improved in the last year. Asking rents are up 2.0% year-over-year. Asking rents in Albuquerque are about half of the national average. This affordability on a national level may have played a role in several recent corporate expansions, including TaskUs' 100,000-SF lease in downtown.

The Mesa Del Sol submarket has one of the highest asking rents in Albuquerque, commanding around a 30% premium over the metro average. Netflix's acquisition of Albuquerque Studios could fuel more demand from ancillary businesses, and also provide a boost to rent gains in the submarket.

Expenses are estimated using NCREIF, Trepp, IREM, and CoStar data using the narrowest possible geographical definition from Zip Code to region.

Office development in Albuquerque has been relatively limited in this past decade. Construction has remained light in the last two years, with a 21,500-SF medical office building at 1817 Wellspring Avenue as the only significant delivery since 2018. The metro's strong absorption in the past was not been met with commensurate supply, due to limited construction. The market currently has only 10,000 SF in the pipeline.

Although New Mexico's non-disclosure status tends to cloud the investment picture, office investors were fairly active in Albuquerque over the past decade according to CoStar's research. More than 6% of inventory has traded annually in four of the past five years. Investors are primarily coming from within the state.

The biggest trade since the beginning of the COVID-19 outbreak was the City of Albuquerque's acquisition of the 572,000-SF Gibson Medical Center for \$15 million (\$26/SF) in April 2021. The city plans to reposition the buildings to multiple uses for the homeless population, including a 24/7 emergency shelter, and facilities to transition the homeless residents to stable permanent housing, as well as providing access to long-term services that will reduce the number of people living on the streets. The timeline for the conversion was not disclosed. Funding for the acquisition was a combination of city funds, including a voter-approved bond, \$1 million from Bernalillo County, and the remainder was from state capital outlay allocations as well as a consortium of private businesses.

Albuquerque has rebounded well, although the broader New Mexico economy still has a way to go in its economic recovery from the pandemic-induced downturn. The state lost about 100,000 nonfarm jobs from March to April of 2020, and has reclaimed about half of these jobs through May 2021. The retail and travel industries remain the hardest-hit employment sectors, along with mining and logging. In Albuquerque, the metro has reclaimed about 35,000 of the roughly 45,000 jobs lost from March to April of last year.

The Great Recession probably should have resulted in an immediate paradigm shift of the local economy. But like many smaller markets, Albuquerque, and all of New Mexico for that matter, was slow to adapt to the evolving market conditions.

Albuquerque's economy is largely focused on the public sector, but the agriculture, tourism, and manufacturing segments also have a substantial foothold.

Local officials and economic development groups have been proactive in diversifying the economy after reeling for years coming out of the Great Recession. Their efforts started to pay off with several major companies announcing expansions in the metro area.

In June 2019, NBCUniversal announced its expansion into Albuquerque, which would create more than 330 jobs with an average salary of \$60,000. The media titan plans to invest \$4 million to convert a warehouse in Martineztown into a TV and film studio. NBCUniversal expects to spend \$500 million in production costs at its studio, with local officials estimating an economic impact of \$1.1 billion over 10 years.

This announcement comes on the heels of another expansion from a major TV and film producer. In October 2018, Netflix announced plans to acquire a 257,000-SF production facility from Albuquerque Studios in Mesa Del Sol. Over the next decade, the online entertainment provider estimates it will invest \$1 billion for its productions in the state and create about 1,000 jobs annually. Netflix's expansion into Albuquerque was facilitated through \$10 million in funding from New Mexico's Local Economic Development Act and \$4.5 million from the city of Albuquerque.

TaskUs, a California-based virtual customer service company, recently leased 100,000 SF at The Galleria in Downtown. The company plans to occupy its office space in early 2019 and bring about 700 jobs over the next five years. New Mexico will provide roughly \$2 million through its Local Economic Development Act, and the city of Albuquerque will pony up around \$1 million in LEDA funding.

Albuquerque accounts for about half of New Mexico's economic activity, although the state's economy as a whole is relatively pedestrian, often ranking in the bottom quarter of most economic indicators. Median incomes, home prices, and the cost of living all fall below the comparable national levels.

One issue facing the metro, and the state as a whole, is a reliance on oil and government. Both sectors have shrunk this cycle and have historically been drivers of the economy.

Although job losses weren't concentrated in Albuquerque as a result of oil price volatility, this means less tax revenue and royalties for the state, which the local economy relies upon for funding after federal sequestration in 2013.

Facebook's expansion into Las Lunas could provide some long-term economic tailwinds to the metro as its data centers deliver in phases through 2023. After breaking ground on its initial phases, Facebook announced that its footprint would expand from two buildings, totaling 970,000 SF, to six buildings, totaling approximately 2.8 million SF.

The social media giant's presence has already generated millions in tax revenue and is expected to bring in millions in new investment, dozens of long-term jobs, and support and ancillary services. For example, Affordable Solar announced that it would construct several solar farms, an investment of roughly \$45 million, to power Facebook's renewable energy-only facility.
